Executive Recommendations

UAE Retail Strategy • Dec 2011

- Replicate the November surge: Revenue peaked at £1.47M in November — a 31.6% MoM spike driven by gifting season. Launch targeted Ramadan and Eid promotions to replicate this pattern mid- year and eliminate the Feb–Apr revenue trough.
- Reduce UK market dependency: 91.5% revenue concentration in UK is a critical risk. Netherlands (3%) and Germany (2.2%) show growth potential — prioritise these for MENA expansion and international diversification strategy.
- Recover at-risk customer revenue: 37% of customers are At-Risk or Lost segments. A personalised win-back campaign targeting these 4K customers with loyalty offers could recover significant revenue before FY2012.

Executive Recommendations

Customer Strategy • UAE Market

- Protect Champions:** 1,626 Champions generate over £6M in revenue — the highest of all segments. Launch a VIP loyalty programme with early access and exclusive offers to retain this critical group.
- Accelerate Repeat Purchases:** 64.1% repeat purchase rate is strong but 2,829 customers bought only twice. A targeted email campaign with personalised incentives within 30 days could move them into the Loyal Customers segment.
- Convert At-Risk Now:** 779 customers are showing churn signals despite churn improving overall. A personalised win-back campaign with loyalty discounts targeting these customers could recover significant revenue before FY2012.
